

ANT-35C1GA-TW-N Antenna

USER GUIDE

The ANT-35C1GA-TW-N antenna is designed for airborne use, but it will operate in any mobile application.

The ANT-35C1GA-TW-N is an active GPS antenna, 88.9 mm (3.5”) in diameter, and designed to operate at the GPS L1 frequency of 1575.42 MHz. Its mechanical configuration is a spherical radius molded radome which provides enhanced protection against rain and ice. This antenna includes the following:

- internal 33 dB low noise amplifier
- bias voltage from 2.5-24 V DC for operation
- band pass filtering
- DC bias provided through the coaxial connector

NovAtel offers optional coaxial cables of various lengths and models for interconnecting between the antenna and NovAtel GNSS receivers.

This antenna is aircraft certified for navigation. This guide provides the basic information you need to install and begin using your new antenna.

ADDITIONAL EQUIPMENT REQUIRED

- A device with an antenna input port that both receives the RF signal and provides 2.5 to 24.0 VDC to the antenna is required to set up the ANT-35C1GA-TW-N. (NovAtel GPS receivers provide the necessary power through their antenna RF connectors.)
- Coaxial cable with a male TNC connector

INSTALLING THE ANTENNA

Both the input DC power and the output RF signal flow over a single coaxial cable that is connected to the unit's TNC female

connector.

The antenna can be attached to a surface by means of a square, 4 bolt, 1.9 inch space mounting pattern as shown in the Mechanical Drawings section of this guide.

Four screws pass through the housing of the antenna.

Install the antenna as follows:

1. The antenna is supplied with an o-ring. Place it in the o-ring groove of the antenna base.  
User-supplied o-ring grease can be used to hold the o-ring in the groove during installation.
2. Pre-drill and tap the mounting holes and drill the connector clearance hole on the surface, see the Mechanical Drawings section of this guide for details on the mounting pattern.
3. Attach the antenna to the surface using the four mounting screws supplied (use of user-supplied thread-locking material is recommended). The o-ring compresses and creates a seal between the surface and the antenna.

Ref. #	Description	Ref.#	Description
1	Antenna	4	O-ring
2	Countersink screws	5	Pre-drilled mounting holes
3	Mounting surface		

4. Remove the dust cap from the antenna’s TNC connector.
5. Attach the male TNC connector of the coaxial cable to the antenna’s TNC connector:

Ref. #	Description
1	Antenna screwed into place
2	Surface
3	TNC connector
4	Coaxial cable

6. Attach the other end of the coaxial cable to the antenna input port of the receiving device, which must provide power as detailed in the *SPECIFICATIONS* section of this guide. All NovAtel GPS receivers provide the necessary power through their antenna RF connectors.

The graphics above show examples of where the antenna may be placed on an aircraft or vehicle (not to scale).

ANTENNA CARE

The ANT-35C1GA-TW-N is designed to withstand the elements, including rain, snow, and dust. However, to ensure your antenna performs optimally, keep the radome clean and brush off any ice and snow. In addition, ensure the TNC connector remains clean and dry and replace the dust cap when a cable is not connected.

L1 ELEVATION GAIN PATTERN

SPECIFICATIONS

RF	
3 dB pass band (typical)	L1 (1575.42 ±12 MHz)
Out-of-band rejection	< -45 dB (±50 MHz)
Antenna Gain (dBic) where G.P. = Ground Plane	Free Space    16" G.P.    4 ft. G.P.
90° zenith	+5.4    +2.2    +4.6
10° elevation	-1.3    -2.4    -1.0
20° elevation	+0.4    -0.3    +1.4
30° elevation	+1.8    +1.7    +1.5
60°-90° elevation	>4.5    +4.6/+2.2    >2.7
LNA gain	33 dB
Polarization	Right-hand circular
Noise figure (typical)	2.2 dB
Nominal impedance	50 Ω
VSWR	< 1.5 : 1
POWER	
Input voltage	2.5 - 24.0 VDC
Current (typical)	< 30 mA
PHYSICAL	
Radome Diameter x Height	8.89 cm (3.50") x 1.75 cm (0.690")
Weight	184.3 g (6.5 oz.)
ENVIRONMENTAL	
Maximum altitude	21336 m (70000 ft.)
Operating/Storage temperature	-55°C to +85°C (-67°F to +185°F)
Vibration	>30 G
Designed to meet these standards	FAA TSO-C144, DO-160D, DO-228, MIL-C-5541, MIL-E-5400, MIL-I-45208A, MIL-STD-810, and SAE J1455

WARRENTY POLICY

NovAtel Inc. warrants that its Global Positioning System (GPS) products are free from defects in materials and workmanship, subject to the conditions set forth below, for the following periods of time:

GNSS Antenna Modules:	One (1) Year from date of sale
Cables and Accessories:	Ninety (90) Days from date of sale

Date of sale shall mean the date of the invoice to the original customer for the product. NovAtel's responsibility respecting this warranty is limited solely to product repair at an authorized NovAtel location only. Determination of repair will be made by NovAtel personnel or by technical personnel expressly authorized by NovAtel for this purpose.

The foregoing warranties do not extend to

(i) nonconformities, defects or errors in the products due to accident, abuse, misuse or negligent use of the products or use in other than a normal and customary manner, environmental conditions not conforming to NovAtel's specifications, or failure to follow prescribed installation, operating and maintenance procedures, (ii) defects, errors or nonconformities in the products due to modifications, alterations, additions or changes not made in accordance with NovAtel's specifications or authorized by NovAtel, (iii) normal wear and tear, (iv) damage cause by force of nature or act of any third person, (v) shipping damage; or (vi) service or repair of product by the dealer without prior written consent from NovAtel.

In addition, the foregoing warranties shall not apply to products designated by NovAtel as beta site test samples, experimental, developmental, preproduction, sample, incomplete or out of specification products or to returned products if the original identification marks have been removed or altered.

The warranties and remedies are exclusive and all other warranties, express or implied, written or oral, including the implied warranties of merchantability or fitness for any particular purpose are excluded.

NovAtel shall not be liable for any loss, damage or expense arising directly or indirectly out of the purchase, installation, operation, use or licensing or products or services. In no event shall NovAtel be liable for special, indirect, incidental or consequential damages of any kind or nature due to any cause.

There are no user-serviceable parts in the GPSAntenna and no maintenance is required. If the unit is faulty, replace with another unit and return the faulty unit to NovAtel Inc. You must obtain a RETURN MATERIAL AUTHORIZATION (RMA) number by calling NovAtel Customer Service at 1-800-NOVATEL (U.S. and Canada only) or 403-295-4900 before shipping any product to NovAtel or a dealer. Once you have obtained an RMA number, you will be advised of proper shipping procedures to return any defective product. When returning any product to NovAtel, please return the defective product in the original packaging to avoid damage.

---

☒ Before shipping any material to NovAtel or our Dealer, please obtain a Return Material Authorization (RMA) number from the point of purchase. You may also visit our website (<http://www.novatel.com>), and proceed to Registered Services from our Home page.

---

QUESTIONS OR COMMENTS

If you have any questions or comments regarding your antenna, please contact NovAtel Customer Service using one of methods provided below.
